

Manikanta Maduri

Full-Stack Developer

📞 9110381506 | ✉ manikantamaduri2023@gmail.com | 🔗 [LinkedIn](#) | 💼 [GitHub](#) | 📍 Hyderabad Telangana

Profile Summary

Full-Stack Developer with 3+ years of experience building **AI-enabled, scalable web and mobile products** using **Next.js, React, Django, Node.js, React Native, and PostgreSQL**. Hands-on experience delivering **LLM-powered features** including **RAG workflows, vector search, document intelligence, and AI API integrations**. Strong background in **system design, API development, third-party integrations, performance optimization, AWS deployment, and team leadership**, with a focus on shipping production-ready solutions for real-world business workflows.

Skills

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Redux, Redux Thunk, RTK Query, Tanstack Query, Angular, Angular Apollo, Angular GraphQL, Server-Side Rendering (SSR), Static Site Generation (SSG), SASS, ES6+, DOM Manipulation, Lazy Loading, Babel, Webpack, i18next, PWA, Figma

Backend: Node.js, Express.js, NestJs, Django Web Framework, Flask, FastAPI, RESTful APIs, GraphQL, Sequelize (ORM), ODM, CRUD, Elastic Search, Microservices Architecture, System Design

Databases: NoSQL, MySQL, MongoDB, PostgreSQL, Neo4J

Cross-Platform & Mobile: React Native, Flutter, Ionic (Angular), Capacitor, WebView-based Frameworks, Push Notifications, Analytics, Dart, Android Studio, Mobile App Development

Programming Fundamentals: C++, Python, Object-Oriented Programming (OOP), Algorithms and Data Structures, ACID Principles

DevOps & Cloud: Linux (Basics), Networking, AWS (IAM, EC2, RDS, S3, SES, Lambda, EventBridge), GCP, Azure Git, GitHub, CI/CD

Other Tools & Concepts: Redis (Caching & Message Queues), RabbitMQ, Docker, SEO (Search Engine Optimization), JSON, Full-Stack Development, Frontend Development, Backend Development, Problem solving

GenAI / LLM: RAG, LangChain, Vector Databases, LLM API Integrations, Hybrid Search, Claude Code, GitHub Copilot, Cursor, Prompt Engineering

Education

Bachelor of Technology

Institute Of Aeronautical Engineering, Electronics & Communication Engineering, 2023

Work Experience

N-Labs

Full stack Developer

Aug 2023 – Present

- Built and shipped **full-stack web, mobile, and enterprise products** using **Next.js, React, Django, Node.js, React Native, and PostgreSQL** across AI, CRM, education, and workflow automation domains.

- Developed **AI-powered capabilities** including **LLM API integrations, RAG-based retrieval workflows, document processing pipelines, and intelligent automation** for search, extraction, and business process use cases.
- Designed and integrated **RESTful APIs, third-party services, and enterprise systems** to support end-to-end workflow automation across business-critical applications.
- Improved application scalability and reliability through **SSR, SEO, caching, background jobs, and performance optimization** using tools such as **Redis, Celery, and AWS**.
- Led teams of up to **5–10 developers**, drove rapid feature delivery, maintained code quality, and handled **client-facing collaboration** to align engineering execution with business needs.
- Managed production deployments and cloud infrastructure using **AWS services** including **EC2, RDS, S3, SES, Lambda, and EventBridge** for secure and scalable delivery.

Projects

Kavion Xtract – AI-Native Document Intelligence Platform (Team Size: 6 | Full-Stack Developer)

Tech Stack: Next.js, Django, PostgreSQL, LLM API Integrations, RAG, Vector Search, OCR / Image Processing, Google APIs, SAP Integrations, Tally APIs

- Built an **AI-native document intelligence platform** for ingestion, extraction, validation, and governance of enterprise documents using LLM-powered workflows.
- Implemented **RAG and vector search pipelines** to enable contextual document retrieval, knowledge discovery, and intelligent question answering across large document repositories.
- Developed **text and image processing workflows** for multi-format documents, supporting extraction from PDFs, scanned files, emails, and images.
- Integrated third-party platforms including **Gmail, Google Drive, Google Docs, SAP, and Tally** to import documents, sync business data, and export processed outputs into downstream systems.
- Designed workflows for **document-to-data-to-system automation**, improving traceability, reducing manual processing effort, and supporting enterprise-ready compliance use cases.

Kavion CRM – Client Relationship Management Platform (Team Size: 5 | Team Lead)

Tech Stack: Next.js, Django, PostgreSQL, REST APIs

- Built and delivered a **client-facing CRM platform** used to manage business workflows, customer data, and operational processes for enterprise clients.
- Led the development team, drove **rapid feature delivery**, and handled client-facing discussions to align technical execution with evolving business requirements.
- Designed and implemented **scalable full-stack modules** using Next.js and Django, with PostgreSQL for reliable data management and reporting.
- Delivered reusable workflows and dashboards for client operations, contributing to faster onboarding and smoother day-to-day usage for organizations such as **Ramoji Film City**.
- Focused on **execution speed, maintainability, and product adaptability**, helping the platform support multiple client-specific requirements efficiently.

Upadhi.ai – AI-Powered Job Portal (Team Size: 10 | Frontend Lead)

Tech Stack: Next.js, Express Microservices, Flask (AI), Elastic Search, Redis, PostgreSQL, React Native

- Developed an AI-driven job portal leveraging ML algorithms for **personalized job recommendations**.
- Led a team of **5 frontend developers**, ensuring consistent architecture and smooth API integration.
- Collaborated with backend teams to design **microservice communication flows** for scalable performance and developed APIs.
- Integrated **Redis caching** to optimize data retrieval speed and reduce server load.
- Enhanced **UI responsiveness** across web and mobile (React Native) for a seamless multi-platform experience.

ITSM – AI-Powered Ticketing Tool (Team Size: 2)

Tech Stack: Next.js, Django REST Framework, Celery, Redis, OpenAI APIs

- Co-developed a **fully functional MVP** within one month for an AI-based ticketing platform.

- Built an **AI service** that generates support tickets automatically from user text input.
- Designed **SLA-based time tracking** for multiple global zones.
- Implemented **role-based access control** and secure authentication using DRF best practices.
- Wrote Celery tasks and used Redis for background tasks and sending emails.

Dhyeya – AI-Enhanced Learning Platform (Team Size: 12 | Co-Lead)

Tech Stack: Next.js (RTK), Node.js (TypeScript, Sequelize), PostgreSQL, MongoDB, Redis

- Built and maintained **full-stack modules** integrating AI-driven learning personalization.
- Led a **frontend team of 5**, improving code reuse and delivery speed through clean architecture.
- Optimized API and caching strategies, enhancing overall **app performance and reliability**.
- Implemented **cross-database integrations** using PostgreSQL and MongoDB for flexibility.
- Served as an **instructor for the MERN frontend curriculum**, mentoring developers in modern web practices.

Axiomcrest Smart School – Cross-Platform School Management App (Team Size: 6 | Senior Developer & Architect)

Tech Stack: React Native, Vite (Web), Node.js, Express.js, AWS (EC2, RDS, S3, SES, Lambda, Event Bridge), TanStack Query

- Designed and architected a **cross-platform school management app** connecting schools and parents.
- Developed **secure REST APIs** with Node.js + Express and implemented **caching via TanStack Query**.
- Deployed complete **AWS infrastructure** — EC2, RDS, S3, SES, Lambdas, and Event Bridge for automation.
- Led the development team through **end-to-end product lifecycle**, from architecture to release.
- Published the app on **Google Play Store**, now live and operational for multiple institutions.

Certifications

- Problem solving - Data Structures and Algorithms from **HackerRank**
- Cloud Computing from **NPTEL – IIT Kharagpur**
- Python from **HackerRank**
- HTML, CSS and JavaScript for Web Developers from **Johns Hopkins University**
- Certification on Advanced React from **META**
- Certification on React Native From **META**
- Django Web Framework from **META**
- Flutter and Dart: Developing iOS, Android, and Mobile Apps from **IBM**
